

25crmo4 Cold Drawn Seamless Tube En 10305-1 Cold Drawn Welded Tubes A790 Uns S31803

Basic Information

Product Specification

- Name:
- Material:
- Length:
- OD:
- WT:
- Application:
- Standard:
- Section Shape:
- Highlight:

- Carbon Steel Seamless Steel Pipe
- Carbon Steel
- 2-12m, Or As Required
- 20mm-600mm, Or As Required
- 2-50mm
 - Fluid Pipe, Boiler Pipe, Drill Pipe, Hydraulic Pipe, Gas Pipe
 - ASTM A53,ASTM A106,API5L,ASME B36 Round
 - cold drawn welded tubes, 25crmo4 seamless tube, seamless tube en 10305-1

Round Cold Drawn Seamless Steel Tubes for Fluid Pipe & Structure Pipe

Cold drawn seamless steel tubes are valued for their precise dimensions, smooth surface finish, high strength, and reliability. They are widely used in various industries where quality and performance are paramount, particularly in applications that require tight tolerances and resistance to high pressures.

Specifications

ltem	Carbon Steel Seamless Steel Pipes	
	ASTM A53, A106, API 5L, ASME B36.10M-1996	
	DIN1626, DIN1629, DIN17175, DIN 2448	
	JIS G3452,JIS G3454,JIS G3455,JIS G3456,JIS G3457,JIS G3461	
Material	Q235B, 20#, Q345B	
	A53B, A106B, API 5L B,X42,X46,X52,X60, X65	
	ST37.0,ST35.8,St37.2,St35.4/8,St42,St45,St52,St52.4	
	STP G38,STP G42,STPT42,STB42,STS42,STPT49,STS49	
	SCH10,SCH20,SCH30,STD,SCH40,SCH60,XS,SCH80,	
	SCH100,SCH120,	
	SCH140,SCH160,XXS,DIN, JIS standard thickness	
	2-50mm	
O.D	20mm-600mm, or as required	
Length	2-12m, or as required	
Tolerance	±1%	
Section Shape	Round	
Processing Service	Welding, Punching, Cutting, Bending, Decoiling	
Application	l Fluid Pipe, Boiler Pipe, Drill Pipe, Hydraulic Pipe, Gas Pipe, OIL PIPE, Chemical Fertilizer Pipe,	
	Structure Pipe, etc	
MOQ	1 Ton	
Payment terms	L/C, T/T(30% Deposit)	
Delivery time	8-14 days	

Features of cold drawn seamless steel tubes:

Seamless Construction: Cold drawn seamless steel tubes are manufactured using a seamless process, meaning they do not have any welded joints along their length. This seamless construction ensures a uniform and continuous structure, eliminating the risk of weak points or potential leakage.

Cold Drawing Process: The cold drawing process involves pulling a solid steel bar or billet through a die at room temperature. This process reduces the outer diameter and wall thickness of the steel, while improving the surface finish and dimensional accuracy. The cold drawing process also enhances the mechanical properties of the steel tube, including its tensile strength and hardness.

Excellent Dimensional Accuracy: Cold drawn seamless steel tubes are known for their precise dimensional tolerances. The cold drawing process allows for tight control over the outer diameter, inner diameter, and wall thickness of the tube, resulting in consistent and accurate dimensions. This dimensional accuracy ensures proper fitment with fittings, connectors, and components in various applications.

Smooth Surface Finish: Cold drawn seamless steel tubes have a smooth surface finish, which is achieved through the cold drawing process. The surface is free from scale, oxides, and other imperfections, reducing friction and turbulence within the tube and facilitating efficient fluid flow in hydraulic or other applications.

High Strength and Integrity: Cold drawn seamless steel tubes exhibit excellent mechanical properties, including high tensile strength and toughness. The cold drawing process aligns the grain structure of the steel, resulting in improved strength and integrity. This makes cold drawn seamless steel tubes suitable for high-pressure and high-stress applications.

Wide Range of Applications: Cold drawn seamless steel tubes find applications in various industries, including automotive, machinery, hydraulic systems, precision engineering, and oil and gas. They are used in components such as hydraulic cylinders, shock absorbers, precision tubes, bearings, and other critical parts that require precise dimensions, strength, and reliability.

Corrosion Resistance: The corrosion resistance of cold drawn seamless steel tubes depends on the specific steel alloy used. Carbon steel tubes may require additional coatings or treatments to enhance their corrosion resistance. Alternatively, stainless steel or alloy steel tubes can be used to provide better resistance to corrosion in demanding environments. Cost-Effective: Cold drawn seamless steel tubes offer a cost-effective solution for many applications. They provide excellent

strength and dimensional accuracy without the added cost of welding or additional fabrication processes.

FAQ

Q1. Are you a manufacturer or trader?

We are a manufacturer, and we can have our own factory produced many steel products.

Q2. Whether your company supports Trade Assurance order?

Yes, we can (100% product quality protection; 100% on-time shipment protection; 100% payment protection)

Q3. Can we get the some samples? Any charges?

Yes, you can get available samples in our stock. If the samples from new production, we will charge some reasonable cost, but this amount will be deducted from your first order.

Q4. How do we build up business relations with your company? Send us your requirement which includes size, coating info, parameters, quantity, destination .

Q5. What is the MOQ? We can accept small orders. Please feel free to contact us, we can meet your requirements.		
Q6. What's your advantage? With high-quality products and efficient customer service, we adhere to the principle of customer first.		
Q7. How long is your delivery time? Delivered within 15 days after receipt of deposit.
